

WAIVER RELEASES FOR THE FOLLOWING: ROOF AND PLANT

Roof Notice:

When performing fumigations it is necessary to walk and work on roofs of structures. This obviously creates situations where damage to delicate or old roofs can be unavoidable. We do not wish to unnecessarily damage anyone's roof. To minimize damage and avoid any misunderstanding, we are making the following recommendations.

1. A representative of our company will, if requested, prior to fumigation be available for appointments to go over your roof conditions
2. Upon arrival at the job site, our crew will check the roof and notify your termite company of previous damage and in some cases, our expectations of the possibility of further damage or breakage during fumigation

I (we) have been expressly informed by First Class Fumigation and/ or Your Termite Company That due to the brittle and fragile nature of tile, metal or other delicate roofs, some damage may occur while placing and removing tarpaulins in the course of fumigation of the structure.

With full knowledge thereof, I (we) hold harmless First Class Fumigation and/ or Your Termite Company from the entire risk of damage during the course of fumigation of this structure.

Plant Notice:

I understand that fumigations performed by **First Class Fumigation** are done according to industry standards, and all possible precautions will be taken to avoid damage to plants. However, in certain situations damage will be unavoidable and additionally, some plants may be killed. It is the Owner's responsibility to prepare plants properly prior to the fumigation. This will minimize or eliminate damage to the plants. If you have any questions regarding preparations, please contact us at (408) 770-4950. I understand the First Class Fumigation and/or Your Termite Company is not responsible for any plant damage resulting from the fumigation.
